SHIVAA JEWELS · JAYAL

SHIVAA BLACK

The card, and the app that makes it work.
Twenty percent off the craft — nothing else.

Six months · free to renew · one tap in the app

ERNATE SHINE JEWELLERY PVT. LTD. · MAIN ROAD, JAYAL 341023

THIS BOOK

What you are holding

Twelve pages. No prices that expire next week, no words you have to ask the counter to explain. What the card is, what the app does, and what happens on the day it expires.

01

The card

20 % off making charges, six months, tied to your mobile number.

02

The app

shivaa.in — installed from the browser, no app store needed.

03

Your papers

Certificates, in-store bills and order tracking, in one place.

04

The renewal

One tap in the last thirty days. Your number never changes.

Everything in this book is done by the app on a phone. Nothing needs a laptop, a password, or a visit to the shop.

This book has a second half. The same twelve pages in Hindi are at the back: turn it over.

THE PRIVILEGE

Twenty percent — on the craft only

A piece of jewellery is four things: metal, stones, making charges, and GST. This card reduces one of those four. The metal you pay for is the metal you take home.

> If a piece carries 10,000 rupees of making charges, you pay 8,000. The metal, the stones, the GST and the delivery stay exactly as they are — and all four lines are shown to you before you pay, not after.

What it is

- \+ 20 % off making charges, on every Shivaa piece
- \+ Six months from the day your card is issued
- \+ Free to renew, as many times as you like
- \+ Tied to one verified mobile number
- \+ Applied automatically at checkout

What it is not

- x Not 20 % off the price of the jewellery
- x Not a discount on gold or silver
- x Not a loan, an EMI or a credit card
- x Not transferable to another person
- x Not a reason to buy what you did not want

The same piece, on the bill

Metal, at the day's rate	unchanged
Making charges	10,000
Shivaa Black, 20 % of making	– 2,000
Stones, GST, delivery	unchanged
You pay for making	8,000

THE APP

Eight things it does

shivaa.in is a shop, not a brochure. Install it once from your browser — Android, iPhone or computer — and the pages you opened keep working offline.

01
Today's rates
Gold and silver through the day, with the source named.

02
The shop
Every piece, with its making charge written separately.

03
Swarna Nidhi
The 11 + 1 plan: eleven months you, the twelfth us.

04
My certificates
Purity and price certificate for each order. Save or print.

05
My bills
In-store purchases in your account. View, or download.

06
Track your order
Insured, seal-checked, OTP-verified at the door.

07
Ring size at home
Measure against a ring you own. No shop visit.

08
Care & buyback
Lifetime care plan, and buyback on the pure gold value.

Free. No subscription, no advertisement, and your number is not sold to anyone.

The rate, and the plan

The rate is the rate

The app shows gold and silver through the day and says where each number came from. When the live feed is unavailable it says so on the page, instead of showing yesterday's figure in today's clothes. Every product page shows the four lines — metal, making, stones, GST — before you decide.

Swarna Nidhi · 11 + 1

Save a fixed amount every month for eleven months. Shivaa pays the twelfth. Then you take gold at the rate of the day you buy it. Your instalments and the twelfth-month gift both show in the app, so nobody has to guess.

Eleven instalments from you, the twelfth from us. On a gold purchase there is no making charge attached to either.

Both of these are on the site today. Where a number cannot be shown honestly, we would rather print the word estimate beside it.

Why it does not feel like a website

Six things were measured, not guessed. A jewellery shop on a phone has to feel like an object in the hand: quick to answer, quiet when idle, and never jumping while you read.

01

It goes quiet

A still page asks for zero animation frames a second. It used to ask for 123, from two loops that never slept.

02

One stylesheet

58 render-blocking sheets became one bundle of 70 layers. The first screen arrives sooner.

03

Films wait their turn

Videos load only when you reach them: zero video bytes at open. Nothing eats your data before you scroll.

04

Every press answers

A tap gets a ripple and, on most phones, a small buzz. A drag does not: a swipe is not a click.

05

Pages slide, not reload

One motion owner per navigation, so a page change moves like an app instead of flashing white.

06

Nothing jumps while you read

No layout animation, no timer that rebuilds the page. Your thumb stays where it was.

Measured on a real page in a test browser, not claimed on a slide. Where a number is a before-and-after, both halves were counted.

Three steps, about forty seconds

1

Scan

Point your camera at the code on the back of this book, or type shivaa.in.

2

Sign in

Enter the mobile number this card was issued to. We send a six-digit code. There is no password to forget.

3

See your card

It appears with the same number printed on the plastic in your hand. From then on the discount applies itself at checkout.

The card follows the number. If you change your mobile, tell us at the counter before you change it, and we will move the card with you.

YOUR PAPERS

Everything in one place

Paper gets lost. A certificate kept in an almirah for eleven years is a certificate nobody can find. The app keeps the same documents, and you can still print them.

My certificates

The purity and price certificate for each order: open, save, print.

My bills

In-store purchases, in your account. Two buttons: view, download.

Track your order

Insured, tamper-sealed, signature and OTP verified at delivery.

Care plan

The lifetime care promise, and what it covers, in the same place.

A bill in the app is the same bill you were handed at the counter, not a summary of it. If the two ever disagree, the counter's copy is the one we answer to.

Size, care, buyback

Find your ring size

Two ways, both in the app: place an existing ring on the screen and match the inner circle, or measure the inside diameter with a ruler. It is the page we open most.

14 · 17 · 20
mm

Lifetime care

Cleaning and polishing are free for as long as you own the piece. Bring it in; we will also tell you honestly if a clasp is tired before it fails.

Buyback

On the pure gold value of any Shivaa piece, with zero deduction. The promise is written down, not remembered, and it is in the app.

Saved in the app

Certificates and bills, in your account, printable any time.

What we never do

No heating at home to test a piece, no toothpaste on gold or stones.

If a clasp feels loose, bring it in. A repair that arrives early is cheap; one that arrives late is a lost stone.

RENEWAL

Six months, then one tap

In the last thirty days of your card's life, a Renew button appears on it in the app. One tap, free. Your member ID and card number never change, so the plastic in your purse stays correct: only the date moves.

If the card lapses, renewal starts from the day you tap it. We do not add months you did not earn, and we do not take any away either.

1	2	3	4	5	6

Month 1 to 6 · renew in the last 30 days

Write your date here

The exact expiry is printed on the certificate in your box, and it is on the card page in the app. It is the same date in both places, and the app is the copy that cannot be lost.

day / month / year

On the day it lapses

- **The privilege stops** — The 20 % comes off your next bill's making line.
- **Nothing is deleted** — Card, certificates and bills stay in your account.
- **A renewal is offered** — One tap restarts six months from that day, free.

PLAIN WORDS

The terms, without the fog

01 The 20 % applies to making charges only, on Shivaa's own jewellery, for six months from issue.

02 It does not apply to bullion, coins, or metal bought at the day's rate.

03 It cannot be combined with another making-charge offer.

04 Renewal is free, and it does not change your member ID or card number.

05 The card is bound to one verified mobile number and is not transferable.

06 A decision on a specific piece is made at the counter, in front of you, on paper.

07 Nothing here is a loan, a deposit, a credit facility or an investment.

If a sentence in this book and a sentence at the counter ever disagree, ask us to write it down. Whichever one we are willing to sign is the one that is true.
